Summary

Experienced software engineer with a proven track record of developing scalable web applications and leading cross-functional teams over 5+ years. Skilled in leveraging modern technologies to solve complex problems and drive innovation. A results-driven professional dedicated to delivering high-quality solutions in the fast-paced tech industry.

Experience

Software Engineer at Tech Corp

- **Location:** San Francisco, CA
- **Duration:** June 2018 - Present
- **Responsibilities:**
 - Led a team of 5 engineers to successfully develop a customer-facing web application.
 - Collaborated with design and product teams to implement new features, enhancing user experience.
 - Optimized backend APIs, resulting in a 30% reduction in response times, improving overall system performance.

Junior Developer at Webworks

- **Location:** Austin, TX
- **Duration:** January 2016–May 2018
- **Responsibilities:**
 - Developed internal tools for process automation
 - Implemented unit tests to ensure code quality
 - Maintained code quality standards for projects

Skills

- Python, JavaScript, HTML, CSS, Django, React, SQL

Education

B.Sc. in Computer Science from University of Example

- **Graduation Year:** 2015
- **Major:** Computer Science

Projects

Personal Finance App

- **Technologies Used:** React, Node.js, MongoDB
- **Description:** Developed and implemented a user-friendly personal finance tracker application to empower individuals in managing expenses and achieving savings goals effectively. Utilized technologies such as React for front-end development and Node.js for back-end functionality. Designed intuitive user interfaces to enhance user experience and drive engagement. Integrated features for expense tracking,

budget setting, and goal monitoring, resulting in improved financial awareness and planning for users.

Blog Platform

- **Technologies Used:** Django, PostgreSQL, AWS
- **Description:** Developed and implemented a secure blog platform enabling users to create, edit, and share posts. Utilized technologies such as HTML, CSS, JavaScript for frontend development, and Node.js with Express for backend. Integrated authentication and authorization features to ensure data security. Collaborated with team members to design and implement user-friendly interfaces. Demonstrated proficiency in full-stack development, emphasizing user experience and data protection.
